

Divine Rivals

Rebecca Ross

**What did you like or not like about the cover? Did the cover reflect the contents?**

I particularly loved the cover of Divine Rivals. The colors, the flowers, the way it was organized, the title just everything just fit together really well. I feel like it did reflect some sort of the contents because the flowers are Iris and the name of the girl in the book is Iris so that match and just the way the cover was made just has the same feel that the story has.

**Your review / Summary of the book that will make other teens want to read it.**

The story follows Iris Winnow who is an eighteen year old journalist and her rival Roman Kitt. Both are in a competition for a promotion at the newspaper that they work at. All Iris wants us to keep her family together but that proves to be much harder than originally thought. Between her brother who went missing from the front lines in a war of Gods and her mother drowning in sorrows Iris's only hope is winning the promotion at the newspaper she works with, the Oath Gazette. Now the question is will Iris win the promotion and keep her family from falling apart or will things take a different turn of events. This book is a historical and romantic fantasy fiction and for anyone who likes this genre of book I highly recommend this book. I was afraid of not liking this book so I put it off for a long time but once I picked it up I found it near impossible to put down.

**Describe the most compelling aspect of the book.**

Definitely the way the book was written and the world. I always liked the world in the books that I have read but this one was just amazing. I feel like the way it was written and the words the author used had a part in it but it was just so good. And the history and lore in the book was beyond great and I truly loved it so much. This is definitely a book I will recommend because I lived and enjoyed it so much. So that is what I personally find the most compelling aspect of the book.

**Were you disappointed with the book for any reason? If so, what was disappointing?**

I can't think of anything I was disappointed about while reading the book other than of course I wished the book was longer but since when I bought the first one the second was already out it was fine. The story was just as amazing as the characters and the world so there is nothing to find disappointing at least in my opinion.

**Did you finish the book?**

Yes, I did finish the book and like a lot of the books I loved I finished it in just a few days. It also wasn't a particularly big book so it also went by faster.

**How would you rate this book?**

I'd rate this book a 4.5 because it really exceeded my expectations and was much better than I had originally anticipated. This would definitely be a book that I recommend because I just had so much fun reading it and it was truly entertaining.
